Migrate to a flash storage solution built for business

Increase performance, consolidate space and power with Bell Integration and Pure Storage

Pure Storage has positioned as a leader in the Gartner Magic Quadrant for Solid-State Arrays for the last five years in a row. Their enterprise flash storage solutions are entrusted by many blue chip organisations to deliver mission critical workloads and provide continuous availability of business applications and data

Our Pure Storage solutions provide our customers with an agile infrastructure that's reliable, fast and affordable. As a market leader, Pure's Flash storage provides workloads without limits with efficient, intelligently automated storage infrastructures that are always on, always fast, and easy to manage.

Migrating your existing infrastructure to Pure without risk

Bell Integration will work with you to assess your requirements and our accredited consultants will propose a strategy to deploy, **migrate**, monitor, manage, optimise and support your Pure Storage solution.

Our processes and **tools** are designed to ensure your data centre, workloads and applications are migrated on time and within budget. Our **infrastructure management** team will proactively monitor your solution ensuring the health, reliability and optimisation of your Pure Flash distribution.

Why Bell Integration

We have over 20 years experience in planning, deploying, optimising and managing storage infrastructure. We provide:

Planning - Through detailed planning and analysis, customers achieve maximum business value from their new Pure solution.

Migration - We have delivered hundreds of infrastructure transformation initiatives on time, on budget and within scope, with minimal risk of disruption.

Deployment - Ensuring the right solution is delivered to meet the organisations demands, balanced against a potentially lower IT budget.

Management, Monitoring & Support - We provide a single point of contact for any escalations and help organisations overcome the complexity of managing a growing number of infrastructure devices.

Continual Optimisation - We right-size our customers Pure Storage infrastructure to meet their needs. Any upgrades are non-invasive with minimal business disruption and system downtime.

Patch Management as a Service - We can ensure your Pure infrastructure is secure, compliant, up-to-date and running smoothly

End of Life Services - Bell provide cradle to grave solutions, any redundant storage will be data wiped and recycled, helping you comply with government legislation.

From the initial consultation through to execution, we will provide the skills and services required to build a Pure Storage infrastructure that exceeds business expectations.

Infrastructure solutions which exceed expectations

Fixed Price - Fixed Outcome

DC migrations that finish on time
& within budget

Always On

Seamless transformation projects
that minimise business disruption

Reliability

Proactive management, monitoring,
automation & support ensuring availability

Reduce Costs

Through consolidating & optimising your
DC infrastructure & applications
