Safer Space

An Industrial Social Distancing Solution

Safer Space

A wearable smart hub that detects and alerts close proximity to co-workers. This helps ensure that government social distancing guidelines for the Covid -19 pandemic are being met in the industrial workplace.

Safer Space utilises Bluetooth connectivity present in the wearable Eleksen hub to detect other hubs and alert on configurable distances. This helps organisations enforce social distancing and keep people safe when they have to work.

A wearable solution to assist industrial employees to maintain their 2m social distancing safe space and industrial employers to monitor:

- **Real Time** - alerts and effectiveness of their social distancing policies in real-time
- **Bump Reporting** - highlighting Issues relating to employee density in different parts of their site(s)
- **Individuals at Risk** - if an employee has been infected then the individual/s they have been in close contact with can be identified
- **Site Comparison** - compare effectiveness of policies across different sites
- **Audit Trails** - demonstrating compliance with recommended policy
- **Detailed Reporting** - for deeper analysis

The Eleksen Smart Hub

The Smart Hub detects close proximity to co-worker

Workers are immediately notified of breach with Sound, Light & Vibration

Reporting and tracking available on the Eleksen Platform

- Additional safety sensors, products and services available
- Cloud based control platform
- Real time analytics

The Safer Space Solution

Eleksen Smart Hub

Wearable device, one per *active* worker, containing GPRS and Bluetooth radios. Device is assigned to a worker using an ICEid tag.

Eleksen Hubstation

Ruggedised storage/charging case for up to 15 Hubs Ethernet/Wifi connectivity for OTA updates. Also available as a rack for up to 100 hubs.

Eleksen ICEid Tag

RFID tag assigned to a worker. Used as a pairing mechanism to associate a worker with a hub on a daily basis.

Heavyweight High Visibility Vest

Washable Heavyweight PPE vest with embedded smart loom and connector for the Smart Hub, and embedded LED warning lights activated by the hub.

Safari High Visibility Vest

Washable Lightweight PPE vest with embedded smart loom and connector for the Smart Hub, and embedded LED warning lights activated by the hub.

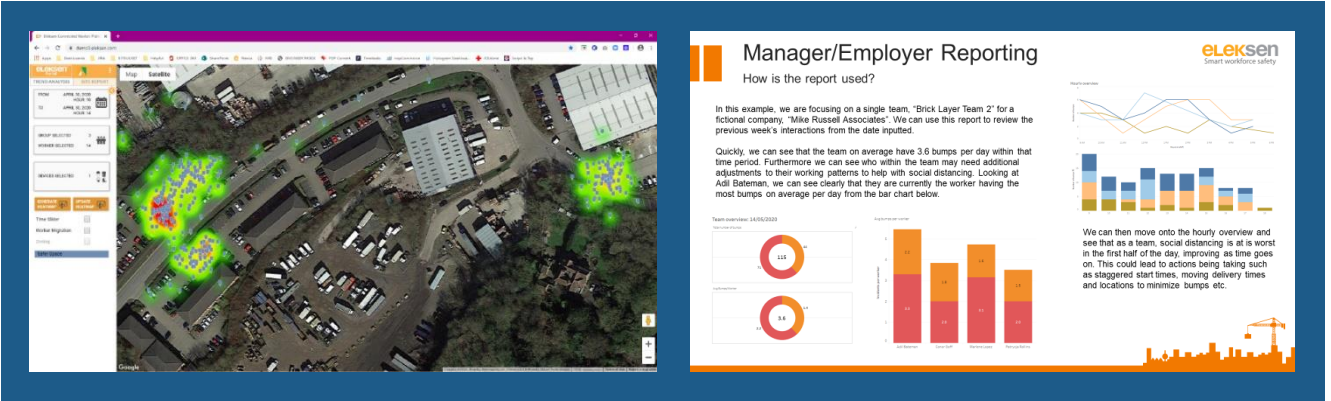

Hub Pouch

For use with existing PPE.

The Safer Space Platform

The Eleksen platform is a pure SaaS application hosted in Amazon Web Services, requiring no additional infrastructure to be built on customer site, accessed via existing client devices via a standard web browser.

Licensed as one-off set up costs per site, plus a per user charge which can be procured as a one-off CAPEX investment for 24 or 36 months, or via a monthly/quarterly OPEX subscription.

How Bell Integration Can Help

Delivering value from a connected world of things requires Internet connected solutions, Bell Integration brings the experience in building supply chain ecosystems that enables you to deliver faster, better at scale, solutions in an ever-evolving world.

Bell Integration distinguishes itself by not simply being a device manufacturer or a standalone service management company.

We deliver an end to end capability, from procurement, asset management, logistics, deployment and ultimately customer support in a multi vendor world. We have over 20 years experience in this capability.
