Contactless Reception with Temperature Check

Screen and protect, help prevent the spread of Covid-19

Contactless Access Control To Your Building With Temperature Screening

Enabling fast, secure and safe access control into the workplace, whilst limiting the risk of contamination.

Your employees, visitors and customers can sign in by scanning a QR code at your premises/location using their device resulting in a smooth sign-in without the need of human interaction.

All-in-one infrared temperature sensing tablets provide a non-invasive temperature check (reading surface body temperature from a distance of 1m). This ensures that people entering a location are not running a high temperature. Accurate to +/- 0.3 °C the tablets provide alerts and appropriate instructions when a person is running a high temperature.

Scan and Protect Help prevent the spread of Covid-19

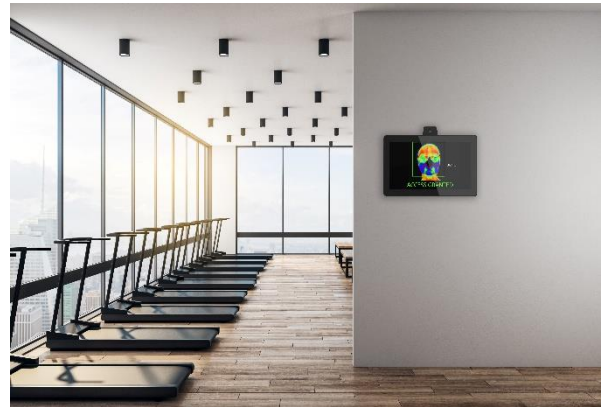

- **Contactless** - Uses a QR Code at location to verify proximity, removing the need for human interaction
- **Hygienic** - Reduces “touching” no pens or kiosks
- **Instant Notification** - Streamlines reception, and can provide notification of arrival
- **GDPR Compliant** - Details are secure
- **Simple and Efficient** - Integrates with calendar systems including O365, fully digital with no more waiting in line
- **Traceable auditable compliance (TAC)** - for Covid 19 reporting
- **Scalable** - Designed to expand with your business demands

Further analytics packages and in depth reporting for due-diligence and legislative compliance can also be provided. Alternative hardware including infrared cameras for mass screening and hand scanners are also available.

Screen and protect,
provide fast, safe and
secure contactless
access control to a
wide variety of
environments

**Our clients are across every vertical,
with our solutions being used in
enterprise, manufacturing, retail,
leisure, health and educational
environments.**
