LICENSE MANAGEMENT

COMPLIANCE

COST REDUCTION

Right size your license estate and optimise Microsoft 365 usage

Right size your M365 volume licensing and reduce costs and meet compliance

Software licencing forms the major part of IT spend for many organisations. With this comes the burden of managing and tracking what licences have been purchased. Often there can be a lack of knowledge of the installed software base which brings the risk of running non-licenced software or over-provisioning of current licencing.

With the influx of remote working this challenge is compounded as the both the workforce and parts of the licensing estate are dispersed. Often this means software procurement is reactive leading to poor commercial deals with providers and lack of governance around new software introduction.

Automated software asset management with Smarter SaaS

Smarter SaaS for 365 automatically recommends how to reduce IT costs whilst finding the best Microsoft Office 365 subscriptions for every user.

Provides Clarity – the M365 license overview dashboard identifies unused subscriptions, shortfalls or optimisation opportunities

Reduces Cost – Continuous license optimisation and automation allows you to avoid over provisioning whilst maintain compliance
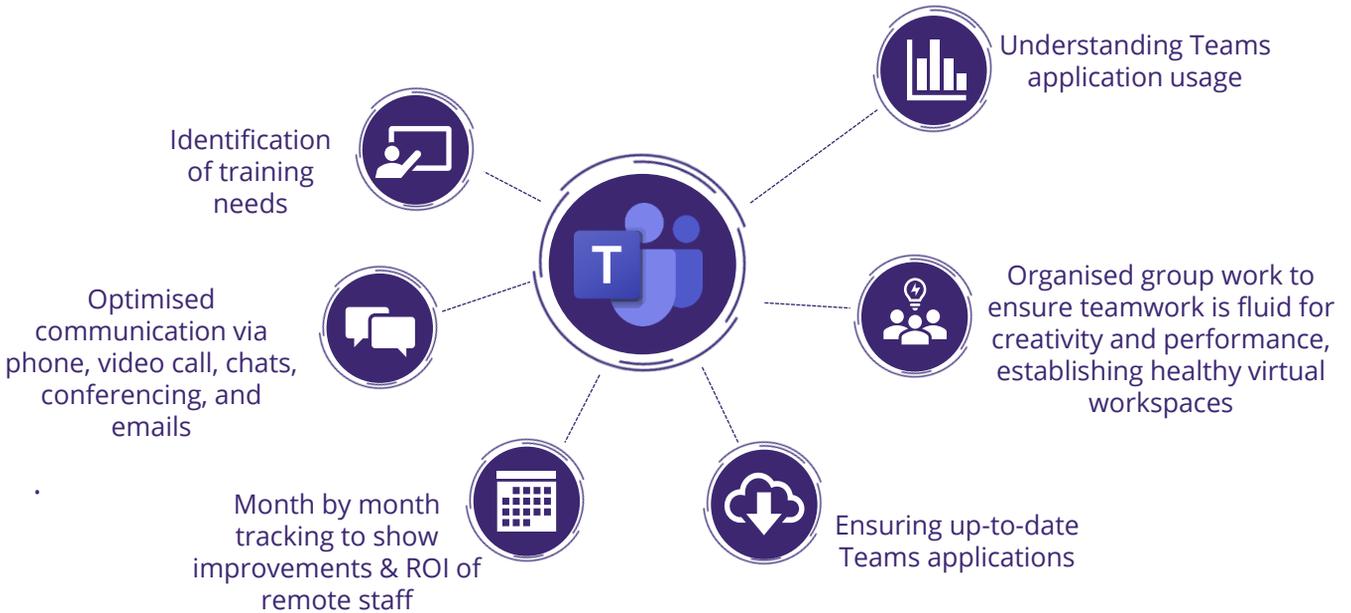

Reporting – helps prove ROI on software spend, compliance and produces an overview of M365 usage within your organisation

Fast and Free – Initial analysis is free for the first 180 days the portal takes minutes to set up

Optimising Microsoft Teams

Smarter SaaS for 365 also assesses Microsoft Team usage and can help identify remote workers who may not be fully engaged.
