

Cloud Platform

Making cloud easy to consume and manage

DANNY INNES
Pre-Sales Principal Consultant

dinnes@bell-integration.com

Whether you're just getting started with public cloud, or are looking to extend your existing cloud services ecosystem, our cloud platform lets you **buy cloud services quickly, easily**, and at the right price.

We believe that buying cloud should be simpler, with easy to understand metrics that show your actual consumption alongside intelligent consolidated bills that enable fool-proof internal cross-charging.

Delivering all the visibility you need to consolidate and control your cloud spend, Bell Integration's platform gives you real-time dashboards and analytics that make it easy to monitor and manage your cloud infrastructure services.

With Bell Integration you will:

- **Achieve a more predictable cloud journey** – prevent overprovisioning, minimise cloud sprawl, leverage the right vendor offerings for your needs and streamline your cloud procurement.
- **Gain the visibility you need to optimise** – and make the most of your cloud investments, even when consuming services from multiple providers.
- **Minimise wastage** – and achieve significant savings on compute costs by decommissioning redundant resources, and matching workloads to requirements.
- **Transform your understanding of cloud spend** – take advantage of granular reporting that makes it easy to identify who's using what, monitor departmental usage, and deliver chargebacks to the business.

Providing full visibility of your cloud workloads, we enable you to **manage cloud spend, establish governance parameters, and gain greater control** over your organisation's cloud use. Making it easier to work smarter in a multitude of ways and optimise your cloud resources for maximum benefit.

Cut through cloud complexity with Bell Integration

Our platform delivers real-time clarity and accountability for cloud consumption across the business.

We provide:

Multi-cloud support - Our solution gives you access to a full range of cloud providers for the efficient purchasing, monitoring and provisioning of services through a single cloud platform

Cloud management - Take advantage of self-service dashboards and access to automated provisioning, governance, and management of multiple cloud providers. Performance and cost saving recommendations are available both from our consultants or via our platform's analytics and reporting function.

Centralised billing - Centralise all your cloud provider accounts into a single consolidated billing platform. As well as helping to reduce cloud sprawl, this enables you to take full advantage of compute and storage volume tiers.

Fast implementation - Get up and running in under an hour, with no upfront costs or additional infrastructure spend required.

Delivering all the visibility you need to consolidate, control and manage your cloud spend
