Our End User Compute solution is designed meet your users needs, we ensure every device arrives **pre-configured and customised** with all the applications they'll need. Right out of the box and on demand.

Supporting today's remote and hybrid workers, our End User Compute solution streamlines how you procure and deploy devices to your users, wherever they are located. So you can dispatch devices at speed, the moment they're needed.

But getting devices into the hands of users is just the start. You also want to ensure that the laptops and mobile devices you provide instantly empower workers to be productive. That means handling everything from end-user enrolment to device configuration and shipping in an intelligent and smart way, so users can get and running with the minimum of hassle from the get-go.

Our service gives you:

- **Rapid deployment of end user devices** – deploy on demand and at scale, no matter where users are located
- **Open box ready** – with configuration, imaging, and provisioning to defined profiles
- **Control** – utilising asset tagging and centralised device and security management
- **Satisfaction** – enable an improved modern and supported user experience that ensures IT teams and users can focus on mission-critical tasks
- **A streamlined and centralised IT procurement process** – that delivers cost reductions and quick access to new technologies

New ways of working call for a new device strategy that can accommodate the very individual demands of today's end-users. We make it easy to accelerate device deployment and enable a truly optimised digital workplace.

We'll handle everything from product and vendor selection and procurement to build management and deployment. **Crafting a service designed exactly around the needs of the business.** So you can enable users to access smarter technology, faster.

Why work with Bell Integration

Flexibility & Efficiency - Initiate a more personalise approach to workplace IT that empowers users to work more flexibly and efficiently. We eliminate the operational and logistical challenges that can get in the way of deploying a diverse range of devices to a distributed workforce.

Satisfy Organisational Needs Fast - Equip your people with the right technology, based on their individual needs, using a trusted provisioning and distribution partner who can deliver the support users want and need.

Simplified Billing - Achieve more predictable and transparent costs with billing that bundles everything – cost of device, provisioning services and support – into a single per-device cost.

Minimise Disruption - Simplify and accelerate hardware refresh cycles, support a truly hybrid workforce and tackle digital transformation projects with confidence.

One Supplier - Reduce the administration burden on your IT teams. We take care of the procurement, provisioning and deployment of devices and can reserve/hold inventory at our integration centres to accommodate end-user demands.

Working with Bell means you will be able to take advantage of our buying power, extensive vendor relationships, and technology expertise.
