

## Secure Data Destruction

Strengthen your data security and decommission IT assets with confidence

**JOHN ATKINS**  
IT Lifecycle Management Account Director

T +44 (0) 2392 825925

jatkins@bell-integration.com

We are experts in creating erasure solutions that **safeguard data of a highly sensitive nature**, we enable organisations in every industry sector to build and maintain robust security policies.

With over 25 years' experience in secure data destruction, we have a deep understanding of the rules relating to data destruction and the relevant industry standards that will apply to your organisation. It's the reason why leading global financial institutions and telecom companies have selected Bell Integration as their IT Asset Management (ITAM) strategic partner.

Finding a coherent and fail-safe approach to managing the secure decommissioning, data wiping and disposal of IT assets makes it possible to re-use and recycle hardware with certainty. Mitigating any data compliance risk that could potentially compromise your company's reputation.

**By gaining control over the full data lifecycle, you'll be able to push forward with developing an IT Asset Disposal (ITAD) strategy that enables you to:**

- **Meet and exceed regulatory standards** - for data security and sustainability
- **Mitigate risk** - by always ensuring sensitive data and confidential information is never left on unused equipment
- **Minimise e-waste** - through the deployment of recycling and re-sale programmes
- **Optimise the re-deployment of usable IT assets** - across the organisations
- **Implement asset recovery programmes** - that extend asset lifecycles, maximise value, and lower TCO

Implementing a well-defined ITAD programme will enable you to **recoup value from retired and non-working IT assets**. But to achieve these goals, you'll need a systematic approach for managing data security.

One that ensures the appropriate data sanitisation and secure erasure of all data-bearing assets in line with the regulatory compliance requirements that specifically apply to your organisation.

### Secure Data Destruction Services from Bell Integration

### Our comprehensive portfolio of services give you:

- **Recommendations** - on the most appropriate secure data destruction option for your assets in line with global and local industry standards (including NSA, HMG IAS5, BSI, NIST) and your organisation's security policies.
- **Secure on and off-site data erasure** - featuring data sanitisation, degaussing and disk shredding (to 6, 15 or 30mm) disposal methods. Use one or a combination for complete peace of mind.
- **Specialist erasure solutions for assets large and small** - USB memory sticks, mobile devices, laptops, servers, network devices, storage, tape drives, hard and solid state drives, circuit boards and more.
- **Certificates of destruction** - together with chain of custody documentation and reportable audit trails.

### Why Bell Integration

**ADISA Accredited** - We're just one of a handful of companies accredited to ADISA's highest standard. The ADISA Standard has been formally recognised by DIPCOG, UK MoD and NCSC's committees and is listed on the National Cyber Security Centre's own guidelines as an accreditation to be considered by companies when disposing of assets.

**Blanco Partner** - We're an accredited Blanco partner and managed service provider, using Blanco's industry leading software to erase data from any data bearing device.

**On-site Managed Services** - We've been selected by public sector organisations, police authorities and global banks and telecommunication firms to manage the on-site removal of sensitive data from their assets. Based at your site, our specialist teams take care of the day-to-day management of data erasure and destruction on your IT assets and assure an ultra-secure solution for your needs.

End-to-end services that reduce data security risk and ensure compliance.

### Contact us

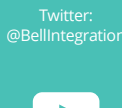

From offices in London, Portsmouth, Wokingham, Krakow, Hyderabad and Singapore, we work with local and global customers across Europe and Asia-Pacific to streamline every aspect of their IT management strategies to maximise efficiencies and increase their ROI, year on year.
