Featuring Office 365, plus a raft of enterprise mobility and collaboration tools, Microsoft 365 is a complete solution hosted on Azure. It eliminates any need for extensive on-premises infrastructure, enabling you to **give users seamless and secure access to the services they need** – no matter where they are working.

**How your Microsoft 365 and Azure solution is designed and implemented is the key to achieving ROI and lasting business value.**

As a Microsoft Gold Partner, we're experienced at guiding organisations through the purchase, deployment and customisation of Microsoft 365 in a way that streamlines user adoption and delivers a truly digital workplace at a predictable cost.

### Stabilise - Optimise - Mobilise - Grow

With Microsoft and Bell Integration

### Our M365 migration solution

Perfected over thousands of projects, our world-class migration methodology will accelerate your Microsoft 365 rollout. Our fully managed migration service covers everything from initial planning to preparing your destination environment and executing your migration.

**Analyse** - We evaluate your organisation's existing resources and create a roadmap for integrating Microsoft 365 with your on-premises systems. We'll also perform Microsoft 365 readiness checks to speed up the IT infrastructure planning process and collect data on assets within your current on-premises.

As well as helping you define your success criteria, we'll also review how you plan to bring users along on the migration journey.

**Optimise** - We'll evaluate which Microsoft licensing models and plans are most appropriate for your organisation's environment. We'll identify current and future needs and ensure you only sign up to the subscription plans and components needed to achieve your goals in the most cost-effective and sustainable way possible.

Focusing on what matters most to your business, we help you optimise workload costs and stay in control of spending. By right sizing the resources you'll need, we'll be able to ensure that your digital transformation doesn't come with a hefty price tag.

**On-time** - To minimise the risk of project delays, we'll identify IT interdependencies and which services, apps, network settings and configurations will need to be carried over to your new environment.

We'll also help you define a clear content strategy so that only relevant content and files are migrated. As part of this process, you'll gain clarity on which data needs to be moved into the cloud first.

**Simplify** - We'll set up your Microsoft 365 administration tools, implementing policies that will optimise the security, mobility and flexibility of your enterprise.

As well as simplifying your workload and minimising the effort involved in maintaining the smooth operation of your environment, we'll make it easy for you to give end-users an all-round satisfying experience.

**Streamlined deployment** - We'll define a migration timeline featuring actionable steps that are aligned with your business goals. As well as identifying which workloads and users should take priority, we'll create a detailed schedule that gives you certainty and minimises end-user disruption.

Whether you migrate in bulk or bit by bit, we'll ensure every aspect of your migration is safeguarded, and no employee is left behind.

Our best practice processes are designed to make your move as quick and as smooth as possible.

**User and data security** - Alongside implementing robust data backup and governance approaches that boost compliance across your environment, we'll optimise and streamline user and data security with options like single sign-in, password integration and multi-factor authentication. Ensuring that users can stay productive, without compromising your organisation's security posture.

**Maximise user adoption** - To assure a successful Microsoft 365 rollout, you need to be certain that everyone will have confidence with using your new platform. Training will be a vital to maximising user adoption. We'll make sure that education is featured in your migration strategy from the get-go. Our training resources and self-help portals will help get users up and running fast.

**We ensure that everyone in your organisation is able to leverage Microsoft 365 to communicate, collaborate and work productively.**

### Contact us

From offices in London, Portsmouth, Wokingham, Krakow, Hyderabad and Singapore, we work with local and global customers across Europe and Asia-Pacific to streamline every aspect of their IT management strategies to maximise efficiencies and increase their ROI, year on year.
