Optimise your IT infrastructure investments to **reduce costs, improve efficiency and accelerate business growth**

From applications to infrastructure and operational models, digital forces are driving change in every part of your organisation.

To compete in today's digital economy you need to be able to leverage new technologies and capabilities fast, while modernising your legacy IT for innovation at speed.

Identifying the right technology strategy is just part of the challenge. You need to build a roadmap for the transformation journey. Ensuring that any technology you implement is secure and appropriately integrated with your business and workforce processes. So you can initiate a future-ready and fully integrated foundational platform that can be scaled and evolved with ease.

To achieve all this, you need to be able to tap into the industry-specific expertise and know-how that's needed to plan, deploy, maintain and support your IT transformation project. Ensuring that everything works together seamlessly and delivers all the agility needed to keep up with shifting market and customer demands.

Transform and future proof your IT infrastructure with fit-for-purpose solutions aligned to current and future business needs

Get on track with Bell Integration

Whether you need to re-boot your IT capabilities for the digital age, make the move to a new platform, or handle complex organisational changes like IT mergers and acquisitions, our technology consultants and IT project management teams are on hand to help and guide you every step of the way.

With Bell Integration you can:

- **Transform and future proof your IT infrastructure** with fit-for-purpose solutions aligned to current and future business needs
- **Optimise your IT infrastructure investments** to reduce costs, improve efficiency and accelerate business growth
- **Embed new technologies** into your core infrastructure, enabling new and innovative ways of working
- **Simplify** technology management
- Achieve enhanced **security, resilience and sustainability**

Experts at implementing advanced enterprise-grade solutions and helping organisations transition smoothly to new platforms and operational models, we'll define the most appropriate strategy for your unique business needs.

When it comes to the migration itself, our highly skilled practitioners will establish the strategy, structure, roadmap, controls and governance you need to move forward with confidence.

Why Bell Integration?

Some of the world's leading enterprises depend on Bell Integration to help drive and support change across their organisation. But we're just as adept at supporting smaller companies too.

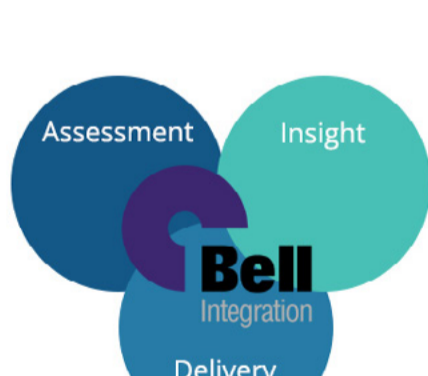

Committed to delivering outcomes, not promises, we help businesses transform and evolve fast with zero disruption. So they can respond to new challenges, unlock innovation and mitigate against risk.

Our unique consulting and orchestrated delivery approach **unlocks long-term value.**

Enabling organisations to radically shift how they operate.

With Bell Integration you're able to:

- Invest in the right technologies to modernise your systems, infrastructure and digital capabilities
- Gain clarity on the right strategic IT direction for the business
- Focus and right size resources
- Tap into our integrated advisory and support services
- Take advantage of our 'assess, design, build and transform' approach that accelerates time to delivery

IT Consultancy

Experts at helping organisations plan, deploy, maintain and support new IT platforms and operational models

Expertise you can rely on

Our IT consultancy and professional services expertise includes:

- **Business mergers and acquisitions** – planning and enabling post-merger IT integrations that are tailored to support business synergies
- **Business change programmes underpinned by IT** – delivering both resilience and agility
- **Data centre migrations** – data centre-to-data centre/data centre-to-cloud
- **Storage and backup** – boost the availability of data, optimise storage resources and policies to avoid data bloating and duplication, and reduce the risk of data loss
- **Virtualisation** – improve the availability of applications and hardware for improved business performance
- **Cloud consulting** – modernise and migrate your architecture, infrastructure and applications to a new cloud infrastructure
- **Cloud services** – migrations, OpenStack Private Cloud, AWS, Azure
- **IT automation** – reduce operational complexity and manage and track complex IT processes across the enterprise
- **Collaboration** – boost digital collaboration and productivity with solutions like Domino, SharePoint and Office 365
- **Workspace optimisation** – utilise the latest workspace technologies to enhance business performance

From strategy to advisory consulting and support services, we cover every aspect of need.
