Smarter SaaS for 365 automatically recommends how to **reduce IT costs** whilst finding the best Microsoft Office 365 subscriptions for every user

You want to maximise the return on your IT investments, ensuring that your Microsoft 365 licensing is rightsized and optimised. So that you can put in the place the best Microsoft Office 365 subscription for every user and avoid the over or under provisioning of software.

By managing your Microsoft 365 assets more effectively you'll be able to:

- Remove inactive subscriptions and redistribute to an active user
- Fully utilise the licenses you are paying for
- Build usage of key apps
- Spot non-allocated applications
- Save money on subscriptions per month
- Stay compliant
- Assess Microsoft Teams usage, identifying remote workers who may not be fully engaged

With Bell Integration, you can take advantage of accurate and actionable data that makes it possible to make savings and efficiencies where they are needed the most. Identifying the best Microsoft 365 subscriptions for every user and constantly monitoring and optimising your Microsoft 365 app usage.

Smarter SaaS offers an automated software asset management solution that provides accurate and actionable information all on one single platform

### Why work with Bell Integration

Working in partnership with TBSC, our Smarter SaaS gives you an automated software asset management

**Clarity** – the M365 license overview dashboard identifies unused subscriptions, shortfalls and optimisation opportunities.

**Cost Reduction** – continuous license optimisation and automation ensures you avoid over provisioning while maintaining compliance.

**Reporting** – insights that prove ROI on software spend, compliance and deliver an overview of M365 usage within your organisation.

**Fast and Free** – initial analysis is free for the first 180 days and the portal takes minutes to set up.

Our Smarter SaaS solution ensures that you're always compliant, without over-provisioning

### Contact us

With over 25 years of experience and offices across the globe, Bell Integration delivers Data Centre, Cloud and End User services within some of the world's most prestigious customer environments. With capabilities covering technology provision, consulting, project & managed services and asset retirement services, we add value to our customers at several touch points throughout the life-cycle of their IT environments.
