Our scalable IoT solutions deliver the real-world data and feedback loops you need to **optimise productivity and resource utilisation**, create workplace profiles, monitor assets and human behaviour, and more

### Transform your workspaces with easy to implement IoT solutions that unlock data-driven insights

Today's IoT technologies are revolutionising how organisations capture and use real-time data relating to assets, spaces and people. Powered by WiFi, intelligent sensors and AI, these next generation platforms enhance the capabilities of today's smart buildings – and make them even smarter.

Available in stand-alone mode or fully integrated with your workplace enterprise platforms or building management system (BMS), our solutions give your HR teams, Facility Managers and senior business managers the data-driven insights they need to unlock smarter decision-making.

### Enable safer, more productive workspaces

Designed to help you address a number of operational challenges and assure the success of your workplace strategies, our IoT powered solutions make it possible to:

- **Design appealing workspaces** and improve the workplace experience for users
- **Understanding how office spaces are being used** and adapt or redesign accordingly
- **Manage desk and room bookings more efficiently** to prevent wastage or overcrowding
- **Identify if savings can be made from downsizing office space** in line with usage – or if it's time to move to a bigger space
- **Achieve sustainability goals** by adapting energy usage to people
- **Right size services** like cleaning and catering
- **Optimise environmental settings** so employees can work more productively and in comfort
- **Track air quality and changes in CO2 levels** to boost worker wellbeing
- **Improve the security** of people and assets

## Integrate and utilise real-world IoT data to work smarter. Everything from elevating operational performance, to identifying ways to **boost productivity and prove compliance**

Ideal for organisations that need to ensure that hybrid working delivers the best possible experience for employees, our solutions make it possible to:

- Identify the best possible combination of hot desking and huddle spaces
- Ensure everyone can reserve the workspaces they need, at the time they need, with zero friction
- Synchronise start times and remote working rotas to avoid overcrowding and optimise access to valuable office resources
- Capture and compare usage of meeting rooms/workspaces in real-time
- Optimise air quality and environmental conditions to match usage and elevate employee performance/wellbeing
- Manage lighting, heating and ventilation on a demand-driven basis
- Monitor working areas 24/7 to keep employees safe and secure

Our end-to-end managed IoT solutions make it easy to get up and running fast. Alongside handling everything from device procurement to installation, we also deliver the IoT data visualisations and analytics you'll need to bring decision-making to life.

### Our solutions address a number of use cases including:

- **Occupancy**
- **ESG monitoring**
- **Waste monitoring**
- **People flow and guidance**
- **Smart resource scheduling**

### Why Bell Integration?

Our scalable IoT solutions deliver the real-world data and feedback loops you need to optimise productivity and resource utilisation, create workplace profiles, monitor assets and human behaviour, and more.

Our solutions enable you to:

- **Stay one step ahead** of changing workplace behaviours and optimise layouts for evolving user needs.
- **Make smarter decisions** about ways to conserve energy and reduce carbon emissions. Introducing small changes that have a big impact on operational costs and the achievement of sustainability goals.

- **Monitor spaces and respond proactively** to events. Our solutions deliver comprehensive visibility of all your resources and assets.

### Our solutions give you:

**An end-to-end design to deployment solution** – that includes monitoring and managing your IoT devices, a Service Desk and a hardware break/fix service.

**Real-time intelligence** – we go beyond simply implementing devices, to ensuring data is delivered as real-time intelligence that can be interrogated and understood by all.

**Powerful integrations** – we can integrate with any room booking system, building management system (BMS) and workspace platform (WMS). Enabling you to extend your IoT connected environment to incorporate other third party applications as you build out automations and give systems an interface to the real world.

Helping you transpose IoT project concepts into a workable reality that will drive new business value fast.

### Contact us

With over 25 years of experience and offices across the globe, Bell Integration delivers Data Centre, Cloud and End User services within some of the world's most prestigious customer environments. With capabilities covering technology provision, consulting, project & managed services and asset retirement services, we add value to our customers at several touch points throughout the life-cycle of their IT environments.
